

ADVANCED MESH BLE Wireless Control Commercial Down light

DESCRIPTION

Construction:

- Round 4/6/8/10in, smooth reflector
- Aluminum heat sink reflectors
- UL94-5VA fire rated PC materials driver box
- Housing less design with spring-action housing clips
- 26in flexible conduit/whip with knockout quick connector
- Aircraft design to support second drop protection
- White/ black finish, Black/Sliver/Nickel/Bronze color inset
- Goof ring, new construction plate options

Optical System:

- Regress style, 95D beam angle and UGR 22
- IP 3528 SMD LED
- 2,700-5,000K and Lumens selectable by App
- Polycarbonate (PC) material diffuser
- Super lighting consistency
- <4 steps for end CCT
- CRI 90 color rendering index (CRI)
- Calculated Life >50k hours @L70
- Saving energy cost: up to 130lm/w

FEATURES

Electrical:

- Integrated Mesh BLE module
- 120-277V AC Voltage @ 50/60Hz
- Power factor (PF): >0.9
- Total harmonic distortion (THD): <25%
- < 30% flicker percent, meet CEC T24 JA8
- Low noise <22dB
- Optional emergency battery backup field installed

Installation:

- Retrofit or New Construction recessed mount
- Hotel, healthcare, meeting room and so on
- Operating temp.: -25°C to +40°C (-13°F to 104°F)
- Suitable for wet locations and Air-tight
- 5-year limited warranty
- Listed to UL 1598
- Energy Star listed
- FCC part 15 Class A
- CA Title 24 Compliant

Set-up Options for Connecting Your Bluetooth Downlight

scan the QR code to download the GreenWay App, follow instructions for direct to phone set-up, this Bluetooth device is compatible with GreenWay Lighting control system only.

App Download:

Commissioning:

GreenWay mobile App is the easiest way to pair devices, create groups, set scenes, set schedules, dimming, color tuning, and adjust high trim based on needs.

Notes:

- Please press icon  on the APP to save the setting after you change the "Sensor Settings" 
- Please do not set the speed (S) less than 0.3 for the "Daylight Harvesting" Speed (S)
- Please do not turn on the sensor function if the downlight does not have this design.

INSTALLATION DIAGRAM

Retrofit Installation

Step 1: Make sure the POWER is TURNED OFF while you are installing the products.

Step 2: If existing fixture and trim are present, remove from ceiling or move it out of the way as it will not be needed during installation.

Measure the ceiling opening to make sure the edge of the luminaire will cover the entire hole and still sit firmly in the ceiling before processing. (Fig. 2)

Step 3: Attach the carabiner safety clip to the existing fixture housing. (Fig. 3)

Step 4: Insert fixture conduit into J-box and wire to power source (see Wiring Diagram above). Reattach J-box cover when done. (Fig. 4)

Step 5: Squeeze the two housing clips so they are in an upright position and insert lamp into housing. (Fig. 5)

Step 6: Once fixture is inside the housing, release the housing clips and continue pushing fixture into housing unit securely fixed and flush with ceiling. (Fig. 6)

Step 7: Restore power and the Installation is complete.

New Construction Installation

Step 1: Make sure the POWER is TURNED OFF in which you are installing the product.

Step 2: Attach the carabiner safety clip to the existing fixture housing. (Fig. 7)

Step 3: Insert fixture conduit into J-box and wire to power source (see Wiring Diagram above). Reattach J-box cover when done. (Fig. 8)

Step 4: Squeeze the two housing clips so they are in an upright position and insert fixture into opening. (Fig. 9)

Step 5: Once fixture is inside the opening, release the housing clips and continue pushing fixture into opening until securely fixed and flush with ceiling. (Fig. 10)

Step 6: Restore power and the installation is complete.
